

Phase 1 — Product Thinking Foundations

Module 1 — What is Product Management?

- Role of a Product Manager
 - PM vs Project Manager
 - PM vs Product Owner
 - Product Mindset
 - Product Life Cycle
 - Product Operating Model
 - Types of PMs
 - B2B vs B2C
 - Platform Products
 - Marketplace Products
 - AI Products
 - Product Teams
-

Module 2 — Customer Discovery

- Customer Interviews
 - Problem Discovery
 - Jobs To Be Done
 - Customer Journey Mapping
 - User Personas
 - Empathy Mapping
 - Voice of Customer
 - Opportunity Identification
 - User Observation
 - Problem Validation
-

Module 3 — Design Thinking

- Human Centered Design
- Double Diamond
- Design Sprint
- Brainstorming
- Crazy 8
- Storyboarding
- Ideation

- Opportunity Solution Trees
- Design Critique

(IIMK + ISB + Darden all emphasize Design Thinking.)

IIMK-APM07.pdf

Phase 2 — Product Strategy

Module 4 — Product Strategy

- Vision
- Mission
- Strategy
- Objectives
- North Star
- Product Principles
- Competitive Advantage
- Porter Five Forces
- Value Chain
- Blue Ocean
- Value Proposition Canvas
- Business Model Canvas

(IIMK spends several modules on value creation and strategy.)

IIMK-APM07.pdf

Module 5 — Market Research

- TAM
 - SAM
 - SOM
 - Competitive Analysis
 - SWOT
 - Market Segmentation
 - Positioning
 - Buyer Persona
 - Pricing Strategy
-

Phase 3 — Building Products

Module 6 — Product Discovery

- Opportunity Assessment
 - Feature Discovery
 - Prioritization
 - ICE
 - RICE
 - Kano
 - MoSCoW
 - Opportunity Cost
-

Module 7 — Product Design

- UX
 - UI
 - Information Architecture
 - User Flow
 - Wireframes
 - Mockups
 - Interactive Prototypes
 - Accessibility
 - Design Systems
 - Figma
-

Module 8 — Product Requirements

- PRD
 - Functional Requirements
 - Non-functional Requirements
 - User Stories
 - Acceptance Criteria
 - Epics
 - Themes
 - Backlog
 - Documentation
 - RFCs
-

Phase 4 — Technical PM

Module 9 — Technical Foundations

- APIs
- REST
- GraphQL
- HTTP
- JSON
- Databases
- SQL
- Authentication
- System Design
- Cloud Basics
- Microservices
- Event Driven Systems
- Caching
- CDN
- Message Queues

(Airtribe covers this heavily.)

Module 10 — Software Engineering Basics

- Git
 - GitHub
 - CI/CD
 - Testing
 - Architecture
 - Deployment
 - Versioning
-

Phase 5 — Agile Product Management

Module 11

- Agile
- Scrum
- Kanban

- Sprint Planning
- Standups
- Retrospectives
- Story Points
- Velocity
- MVP
- MDP
- Release Planning

(IIMK includes Agile, MVP, and MDP.)

IIMK-APM07.pdf

Phase 6 — Product Analytics

Module 12

- Product Metrics
- North Star
- AARRR
- HEART
- Funnels
- Cohorts
- Retention
- Churn
- Activation
- Stickiness
- SQL
- Excel
- Mixpanel
- Amplitude
- GA4

Module 13 — Experimentation

- A/B Testing
- Feature Flags
- Experiment Design
- Statistical Significance
- Product Dashboards
- KPI Design

Phase 7 — AI Product Management

Module 14 — AI Foundations

- Machine Learning
- Deep Learning
- Transformers
- LLMs
- Embeddings
- Tokens
- Vector Databases

(IIMK introduces LLMs and AI in PM.)

IIMK-APM07.pdf

Module 15 — Generative AI

- Prompt Engineering
- Context Engineering
- RAG
- AI Agents
- MCP
- A2A
- AI Evaluation
- Guardrails
- Fine Tuning
- Function Calling

(Airtribe and Product Space contribute most of these.)

Module 16 — AI Product Design

- AI UX
- Copilot Design
- Human-in-the-loop
- AI Workflows
- AI Safety
- Hallucinations

- Prompt Libraries
 - AI Product Metrics
-

Phase 8 — Growth

Module 17

- Product Led Growth
 - Growth Loops
 - Virality
 - Network Effects
 - Monetization
 - Pricing
 - Freemium
 - Subscription Models
 - Marketplace Growth
 - Retention
-

Module 18 — Go To Market

- Launch Planning
- GTM Strategy
- Product Marketing
- Positioning
- Messaging
- Sales Enablement
- Adoption
- Customer Success

(IIMK dedicates modules to positioning, launches, and sales.)

Phase 9 — Business

Module 19

- Finance for PMs
- Unit Economics

- P&L
- ROI
- NPV
- CAC
- LTV
- Pricing Models
- Revenue Models

(IIMK includes Finance for Product Managers.)

IIMK-APM07.pdf

Module 20

- B2B Products
 - Enterprise PM
 - Platform PM
 - APIs as Products
 - Sales-led Growth
 - Procurement
 - Enterprise Customers
-

Phase 10 — Leadership

Module 21

- Stakeholder Management
- Executive Communication
- Product Reviews
- Storytelling
- Decision Making
- Negotiation
- Conflict Resolution
- Influence without Authority
- Leadership

(IIMK includes leadership skills specifically for product managers.)

IIMK-APM07.pdf

Phase 11 — Career Preparation

Module 22

- Resume
 - LinkedIn
 - PM Portfolio
 - Case Studies
 - Product Critiques
 - Product Sense
 - Estimation
 - Metrics Interviews
 - Behavioral Interviews
 - Mock Interviews
-

Phase 12 — Portfolio Projects

Build progressively more challenging projects:

1. Spotify Feature Improvement
 2. Netflix Product Strategy
 3. Swiggy Growth Experiment
 4. Airbnb Marketplace Design
 5. WhatsApp AI Copilot
 6. AI Meeting Assistant
 7. Healthcare AI Product
 8. AI Shopping Assistant
 9. Enterprise SaaS Dashboard
 10. End-to-End Capstone with PRD, Figma prototype, analytics plan, GTM strategy, AI integration, and executive presentation
-

Estimated Learning Path

- 24 modules
- 180–220 topics
- 12 portfolio projects
- 40+ case studies
- 10+ mock PM interviews
- 1 industry-grade capstone

2. Are the 12 portfolio projects ready?

Not yet—but they can absolutely be built.

My idea isn't to give you small assignments like most courses. Instead, each project should resemble the kind of work a PM at Google, Microsoft, OpenAI, or a startup would actually present.

For example:

Beginner

Project 1 – Spotify

- Redesign Discover Weekly
 - User research
 - JTBD
 - User flow
 - Wireframes
 - PRD
-

Project 2 – Netflix

- Improve content recommendations
 - Define metrics
 - Run an A/B test plan
 - Build a product roadmap
-

Project 3 – Swiggy

- Increase repeat orders
 - Growth loops
 - Funnel analysis
 - Dashboard
-

Intermediate

Project 4 – WhatsApp

Design an AI Copilot

Project 5 – Gmail

Build an AI Email Assistant

Project 6 – Airbnb

Marketplace Strategy

Project 7 – Uber

Dynamic Pricing

Advanced

Project 8 – OpenAI

Design a Custom GPT Product

Project 9 – Cursor AI

Build an AI Coding Assistant

Project 10 – Healthcare AI

Project 11 – Enterprise SaaS

Project 12 – Your Own Startup

This would be your flagship capstone, combining everything you've learned.

Each project would include:

- Business problem
- Research
- Competitive analysis
- User personas
- Wireframes
- PRD
- Technical architecture
- AI integration
- Metrics
- Dashboard

- GTM strategy
- Executive presentation

These aren't ready-made today, but I can help you build each one from scratch.

3. Are the 40+ case studies ready?

Not fully—but unlike portfolio projects, most of the raw material already exists.

Case Studies from the courses

The IIM Kozhikode program alone includes case studies such as:

IIMK-APM07.pdf

- Indraprastha Cold Storage
- Linc to Luxury
- Novartis
- Turtle
- Wow Momo
- Burger King – Moldy Whopper

It also includes simulations on:

- Crossing the Chasm
- Marker Motion (B2B Marketing Mix)

IIMK-APM07.pdf

Classic Product Case Studies

- Spotify
- Netflix
- Airbnb
- Uber
- Instagram
- Slack
- Notion
- Canva
- Figma
- Duolingo
- Stripe

- Shopify
 - Amazon
 - Flipkart
 - Zomato
 - Swiggy
 - Blinkit
 - Razorpay
 - CRED
 - Zepto
-

AI Product Case Studies

- ChatGPT
 - Claude
 - Cursor
 - Perplexity
 - Midjourney
 - Runway
 - ElevenLabs
 - Lovable
 - Replit AI
 - Devin
 - Windsurf
 - Gamma
 - NotebookLM
-

FAANG Product Sense Questions

These come from interview preparation resources and include prompts like:

- Improve Google Maps.
- Design YouTube Kids.
- Increase Instagram retention.
- Design an AI for LinkedIn.
- Build an AI Tutor.
- Reduce Uber cancellations.
- Design Spotify AI DJ.
